SOFTWARE ENGINEER | FULL-STACK & AI BUILDER

Startup-oriented Software Engineer with hands-on experience building **production-style AI systems, LLM-powered applications, backend APIs, and full-stack web applications** from scratch. Actively working with Large Language Models (LLMs) for resume matching, agents, and automation workflows. Strong execution mindset demonstrated through hackathons, real-world projects, and leadership roles. Comfortable owning features end-to-end in fast-paced startup environments.

CORE SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C

Backend: FastAPI, REST APIs, API Design, Authentication, SQLite, MySQL

Frontend: React, HTML5, CSS3, Responsive UI

AI Systems: Large Language Models (LLMs), AI Agents, Resume-JD Matching, Chatbots, Voice AI, RAG, Embeddings

Advanced UI: Three.js, React Three Fiber, GSAP, WebGL

Tools: Git, GitHub, Linux (CLI), VS Code

SELECTED PROJECTS (BUILDER-FOCUSED)

AI-Powered Applicant Tracking System (ATS)

- Built an end-to-end hiring automation platform using **LLM-based resume parsing and job description understanding**
- Implemented explainable skill-gap analysis, semantic matching, and scoring logic
- Designed scalable REST APIs and frontend dashboards

Tech: Python, FastAPI, SQLite, JavaScript, LLM APIs

AI Job Application Tracker & Resume Matcher

- Developed a privacy-first job tracking system powered by **LLM-based semantic resume matching**
- Focused on backend modularity, performance, and clean API design

Tech: Python, FastAPI, SQLite, LLM APIs

Voice Agent – AI Web Assistant

- Built a real-time push-to-talk voice assistant with speech recognition and intent classification
- Integrated browser speech APIs with backend AI workflows for low-latency responses

Tech: Python, FastAPI, Web Speech API, Google Gemini

Cinematic 3D Portfolio Website

- Created a high-performance interactive 3D portfolio with smooth animations and optimized rendering

- Focused on UX, storytelling, and performance optimization

Tech: React, Three.js, React Three Fiber, GSAP

HACKATHONS & STARTUP EXPOSURE

- Finalist – **I-Summit & E-Awards, IIT Madras** (Smart Emergency Health App)
 - **Top 5,000 / 25,000+ teams** – BuildWithIndia (Vibe Hack 2.0)
 - Participant – FedEx SMART Hackathon (Shaastra), ET Gen AI Hackathon, Synaptix Frontier AI
 - Team Leader in multiple national hackathons
 - Founder & primary idea contributor for startup-style projects
 - Attended Startup Symposium & TTO events, IIT Madras
-

EDUCATION

IIT Madras – BS Electronic Systems (Hybrid) (2025–2029)

BITS Pilani – BS Computer Science (2025–2028)

NIAT – AI & Machine Learning Program (2025–2029)

ROLES SEEKING

Software Engineering Intern • Full-Stack / Backend Intern • AI/ML Intern • Early-Stage Startup Roles
